Empathy Map Canvas

Primary User: Employee

The primary user for this empathy map is an employee working in an organization who may encounter different workplace issues, such as network or VPN difficulties, laptop-related problems, software issues, or problems accessing required services.

User Context

The employee needs a convenient and organized way to communicate workplace problems to the appropriate support team. Without a structured reporting process, the employee may be unsure about which category to select, what information to provide, and how to know whether the issue is being processed. The empathy map focuses on understanding the employee's expectations, concerns, actions, and desired improvements while raising and following up on workplace issues.

THINK & FEEL

• Wants the issue to be recorded correctly.
• Wants to provide all required information without confusion.
• Wants the issue to reach the appropriate team.
• Wants visibility into the status of the issue.
• Is concerned that an email or informal request may be overlooked.
• Expects the issue-raising process to be simple and convenient.

HEAR

• "Send an email to the concerned team."
• "Provide the required details."
• "Your issue will be checked."
• "Contact HR or the support team for assistance."
• Different teams may provide different instructions for raising issues.

SEE

• Emails and informal communication channels being used to raise issues.

• Different methods of submitting different types of workplace issues.
• Forms or communication channels that may require different information.
• Limited visibility into the progress of an issue after it has been raised.

• Multiple types of workplace issues, including access, payroll, infrastructure, and HR-related concerns.

SAY & DO

• Describes the issue through email or informal communication.
• Contacts HR, support, or another responsible team when assistance is required.
• Provides information about the issue when requested.
• Follows up when the issue is not resolved within the expected time.
• Looks for a simple and standardized way to raise workplace issues.

PAIN

• Lack of a standardized issue-submission process.
• Uncertainty about what information should be provided.
• No clear visibility into issue status.
• Delays caused by manual communication and follow-ups.
• Difficulty determining the appropriate team for an issue.
• Risk of incomplete or inconsistent information being submitted.

GAIN

• Simple and centralized issue-submission process.
• Structured capture of relevant issue information.

• Clear categorization using Category and Subcategory.
• Better visibility and management of submitted issues.
• Reduced dependence on emails and informal communication.
• Faster and more consistent handling of employee issues.

User Need

The employee needs a simple, centralized, and standardized way to raise workplace-related issues with the necessary
